Thanks. Its probably fine then? I think ok if Cirian sticks to the confines of below and summarizing general findings. Maybe check in with him and make sure he's comfortable handling follow ups and doesn't get into weeds on specifics. I think he/we could maybe get into a little more context on next steps and how this report will inform moving forward.

CFAC has provided EPA with the draft of the Phase I "Data Summary Report" and Screening level Ecological Risk . We are in the process of reviewing the report. A copy is currently being made for the repository in the Columbia Falls Library, and CFAC is making it available electronically. Upon completion of our review we will use this information to help guide any changes necessary on the next phase of sampling.

EPA will be meeting with Columbia Falls City council on April 17th and joining the Community Liaison Panel public meeting on April 19th.

Ok, can you send fresh version of statement? I am not recalling details off top of my head. We should consider amending statement, if needed and as appropriate, based on volume and nature of calls. Emphasis is we are reviewing in detail and focus on next steps in process (this is part of site investigation, informing cleanup needs/options, etc) and mention planned community/public outreach and ops for input/feedback?

We are getting a few calls on this report. This reporter was given our statement I believe.
